PROJECTS

Project 1 / SMarta

Combining three APIs in a fully functional app to help users find MARTA bus stop locations and coordinates for individual bus routes. SMarta also locates buses in real time to address whether they are on schedule. This allows users to know if they will arrive to their destination on time.

New Languages Applied: HTML, GIT, CSS, Bootstrap, JavaScript, JQuery, Ajax, Firebase

Project 2 / Student Life Raft

Student Life Raft is a free application available for college students. SLR allows users to exchange tutoring sessions in certain subjects they are strong in or need help. User can post requests and monitor live updated posts, tutoring in progress, and completed sessions.

New Languages Applied: NodeJS, JS-Constructors, MySQL, Express, Handlebars, Sequelize

Project 3 / JBOT

JBOT is a full stack application designed to supervise, manage, and protect a child's learning in a Monitored Online Learning Environment (M.O.L.E.) through interactive games. JBOT is a COPPA compliant learning application for kids under the age of 12.

New Languages Applied: MERN, Mongo, Mongoose, React, Computer Science
